Columbia Recording Studios Identifiable by machine-stamped codes in the runouts: ZTSP (7" 45 RPM mono), ZTEP (7" 45 RPM EP mono), TLP (1949 custom 10" LP's), XTLP (1949 custom 12" LP's), TV (10"), XTV (12" LP mono), XSV (12" LP stereo), ZTV (7" mono), ZSV (7" stereo), QXSV (12" LP quadraphonic), QZSV (7" quadraphonic), P (10" 78 RPM), XP (12" 78 RPM), ZP (7" 78 RPM), PA (10" 78 RPM EP), XPA (12" 78 RPM EP), ZPA (7" 78 RPM EP). Additionally one of Columbia Recording Studios' mastering rooms, in the 1956-57 period, did have a stamped 5-pointed star on some lacquers on both LP and 45. Seen on both Hollywood and Bridgeport pressings.

Not sure I've ever seen one before. I don't think we're supposed to enter unicode symbols either.
I've seen it listed a few ways in subs.
IAM [Inside of triangle] is how I've entered the description in the past.
Something like that seems to be the norm. There's a bunch with only IAM entered.
There's also The Beach Boys - All Summer Long, which is a little creative IMO, I'm not sure if that's really acceptable.
At least there's an explanation in the notes.

It's usually on the subs I have been making part of my collection in one of the forms you guys have used, but when I enter it myself it's usually /IAM\ .

yeah, not a fan of the /IAM\ I have to say; the slashes are characters which very well may actually appear in a matrix. So using them to mean something else is just going to be confusing. Isnt it a common convention to use square brackets for symbols and such? I have seen that used for other logos on CD matrixes for example. So, something like [IAM in a triangle].

> Showbiz_Kid
> when I enter it myself it's usually /IAM\ .

I just think it's a little too creative. No offense.

Respectfully, I tend to agree with

Thanks everyone. I'll go with the [IAM in a triangle]. Would be nice though if we had a handy page of characters we could use, and it was "stickied somewhere. Jus' sayin' :)

Perhaps maybe we should try and standardize terminology for non-transcribable symbols that frequently appear in runout etchings?

This all sounds like a really deep project though with a lot of edits and lengthy discussion and probably not the best overall use of time.

I am more a fan of personal preference + not changing things that are otherwise correctly entered to suit personal preference. This has worked for me pretty well so far without getting yelled at for breaking things.

Come to think of it, this may be a good project for the reference section.

> TopCats45s
> Shelley Products, Huntington Station, NY

Also uses an Ƨ symbol (backwards S usually in a circle) or an embossed X symbol (not quite a capital X, it's a little taller/stretched out).

Research Craft has the patent in the runout: U.S.PAT.# RE 23,946 G B PAT.# 713,418

United Record Pressing has an etched Ⓤ in the runouts (newer records mostly)

How about the Scranton "anvil" or whatever it is. I generally just put [Scranton stamp] in the description, but some sort of symbol would be helpful. What's the accepted practice?
